Specie Name : Orchid: Zygopetalum ( Artur Elle Bright and Blue)

Location: Orchideeënhoeve in the Netherlands in 2015. This is a place where the show all kind of Orchids to people that come there.

The Zygopetalum orgin is from South-America. The orchid grows in nature on tree stumps and rocks in a humid environment. It is special feature are characterized by large, felt or silky flowers with similar, green-brown colored crown and sepals, which are fused together at the base, and a white or lilac flower lip with an elevated callus and a blue or purple.

I did take this Photo with a Nickon D750 and a 105 mm lens.
